

WOW-CYCLE

International Recycle Waste Management System Certificate

WOW CYCLE International Recycling Waste Management System is a certification program that meets the relevant legal legislation requirements and inspects and certifies all legal conditions. Certification processes are a system document that inspects and certifies all necessary waste management systems and recycling processes of the production or service facility.

In order to prevent waste and reduce its impact on the environment, the disposal of waste products must comply with a number of international, regional and national regulations.

The WOW-CYCLE program ensures that the wastes that will arise after production or use of Plastic, Electrical and Electronic Equipment, Plastic and other Packaging types, Batteries and Accumulators, which apply for certification in their own countries, comply with the legal requirements, supervises and continuously monitors within the scope of current audit with the certification system.
